StayAwake

StayAwake is a small application for Windows, which allows to temporarily **disable the screensaver, sleep, hibernation** and anything else that is launched when the computer is idle.

StayAwake can be useful if you want to watch a movie and you have to move the mouse every few minutes to avoid the screensaver. It can also help if you would like to disable the screensaver, but you can't because of some sort of security policy.

[Click here](#) to download the latest version or [here](#) to visit the **StayAwake** project page on Sourceforge.

StayAwake is:

- + configurable, still very easy to use;
- + lightweight (executable size is less than 50 KIB, memory usage at runtime is usually below 1 MiB);
- + free!

The screenshot shows a Safari browser window with the address bar at `sourceforge.net/projects/coffee-sc/files/`. The page title is "Coffee - Browse Files at SourceForge.net". The main content area features a "Coffee" project header with a coffee cup icon and the text "Brought to you by: stevencole". Below this is a navigation bar with tabs for Summary, Files, Reviews, Support, Wiki, Tickets, Discussion, Donate, and Code. A prominent green button says "Download Latest Version" with the text "Coffee 1.0.4 Portable 64 Bit.zip" and a "Get Updates" button. A table lists the files and folders available for download.

The screenshot shows a Safari browser window displaying the Google Play Store page for the app "Stay Alive! Écran Éveillé". The browser's address bar shows the URL: `play.google.com/store/apps/details?id=com.synetics.stay.alive&hl=fr`. The page features the app's red icon with a yellow lightning bolt, its name, developer "SynetDev", and a 5-star rating from 5,423 users. A green "Installer" button is visible. Below the main app information, there is a video player with the text "Keep Your Screen AWAKE" and a play button. To the right, a "Articles similaires" section lists other screen-locking apps like "Garde l'écran allumé", "Keep Screen On Icons", and "No Screen Off". The browser's top bar shows the date "Sun, Feb 26" and time "16:48".
